

Mini-UV Light

A handy tool for spotting counterfeit bills and fake credit cards

This amazing MINI-UV “black” light is perfect for spotting Ultra Violet (UV) security features to verify the authenticity of currency, credit cards, travelers checks, IDs and other important documents.

Simply push the button and a bright blue UV light is emitted from this thumb-sized, handy tool.

Use the MINI-UV light to check new US currency.

All new bills produced except the \$1 bill have a security strip imbedded into them. Each strip is coated with special UV ink that turns a different color when subjected to UV light:

\$100 - Red \$ 50 - Yellow \$ 20 - Green
\$ 10 - Orange \$ 5 - Blue

Use the MINI-UV light to check credit cards.

All major credit cards have letters or an image printed on the front of the card in UV ink. Credit cards that DON'T HAVE any UV printing are suspect and a red flag for a thorough verification.

Use the MINI-UV light to check printed receipts.

POS receipts can now be printed with authenticating UV inks which show when exposed to UV light.

MINI-UV light works on traveler's checks, driver's licenses, ID's and other important documents.

The MINI-UV light comes with a handy key chain making it easy to carry around so you can readily check any documents for UV security features.

It is an inexpensive, indispensable tool that you can get that can help prevent fraud – and save you hundreds of dollars.
