

SDL® – Specialty Drum Labels

A patented adhesive system that reduces costs.

SDL reduces your labor costs in reclaiming used drums with its unique adhesive system. The label remains permanently adhered to the drum until you want it to be removed. This special system allows label removal in up to 80% less time than a conventional drum label. Scraping the remnants of the label off the drum is a thing of the past with SDL.

- No more scraping
- No more grinding
- No more costly and hazardous chemicals
- Safer for your employees
- No damage to the surface of the drum
- Ready for the paint booth

SDL is available in three durable stocks:

Tyvek® – Dupont’s world renowned durable material.

Syn Drum® – Nashua’s proprietary material with the durability and printer flexibility you need.

SynDrum Elite® – Nashua’s proprietary material with greater durability and expanded printer flexibility.

The entire SDL line of products is available for a wide array of printing platforms:

	Impact Pin-fed	Thermal Transfer Roll or Fanfold	Laser (Flash) Pin-Fed	Laser (Hot) Cut Sheet
Tyvek	Yes	N/A	Yes	N/A
SynDrum	Yes	Yes	Yes	N/A
SynDrum Elite	Yes	Yes	Yes	Yes

Drum Reclamation Labor Savings Worksheet:

This example details anticipated savings in reclamation labor for an operation that reclaims 100,000 drums annually. “Peel & Paint” refers to removing the label then repainting. The SDL residue is ready to paint.

PEEL & PAINT RECLAMATION

Minutes per Drum	5	Nashua SDL Time Savings	80%
Drums per Man-Hour	12	Savings per Drum	53¢
Labor Cost per Hour (included)	\$8.00 (SRE	Example:	
Labor Cost per Drum	67¢	100,000 Drums Reclaimed Annually	
		Total Labor Savings:	\$53,000
