

# Stop Thieves in Their Tracks

## Fraud-u-Lite Plus

Counterfeit detector with full-spectrum UV light and other security features

### Full-spectrum UV-sensitive light

Our counterfeit detector system uses 2 powerful full-spectrum bulbs that are highly sensitive to UV ink found on currency bills, credit cards, driver's licenses, travelers checks and other legal tender.

### Incandescent lightbox

It has an incandescent lamp for easy watermark detection, for verifying older bills that do not have UV security stripes.

### Ink sensor

It also has a MICR (magnetic ink character recognition) unit that "chirps" and lights up a red LED when a real US bill is passed over it.

Place currency, credit cards, money orders, ID's, passports, and other secure documents under counterfeit detector to check for embedded UV security stripes and symbols.

### Nashua Fraud-u-Lite Plus – Item #1620300

Quantity	Unit Price
1-16	\$21.95
17-32	\$19.95
32+	\$16.95
